

# Professional CAD Support Services for Architects

[www.DesignPresentation.com](http://www.DesignPresentation.com)

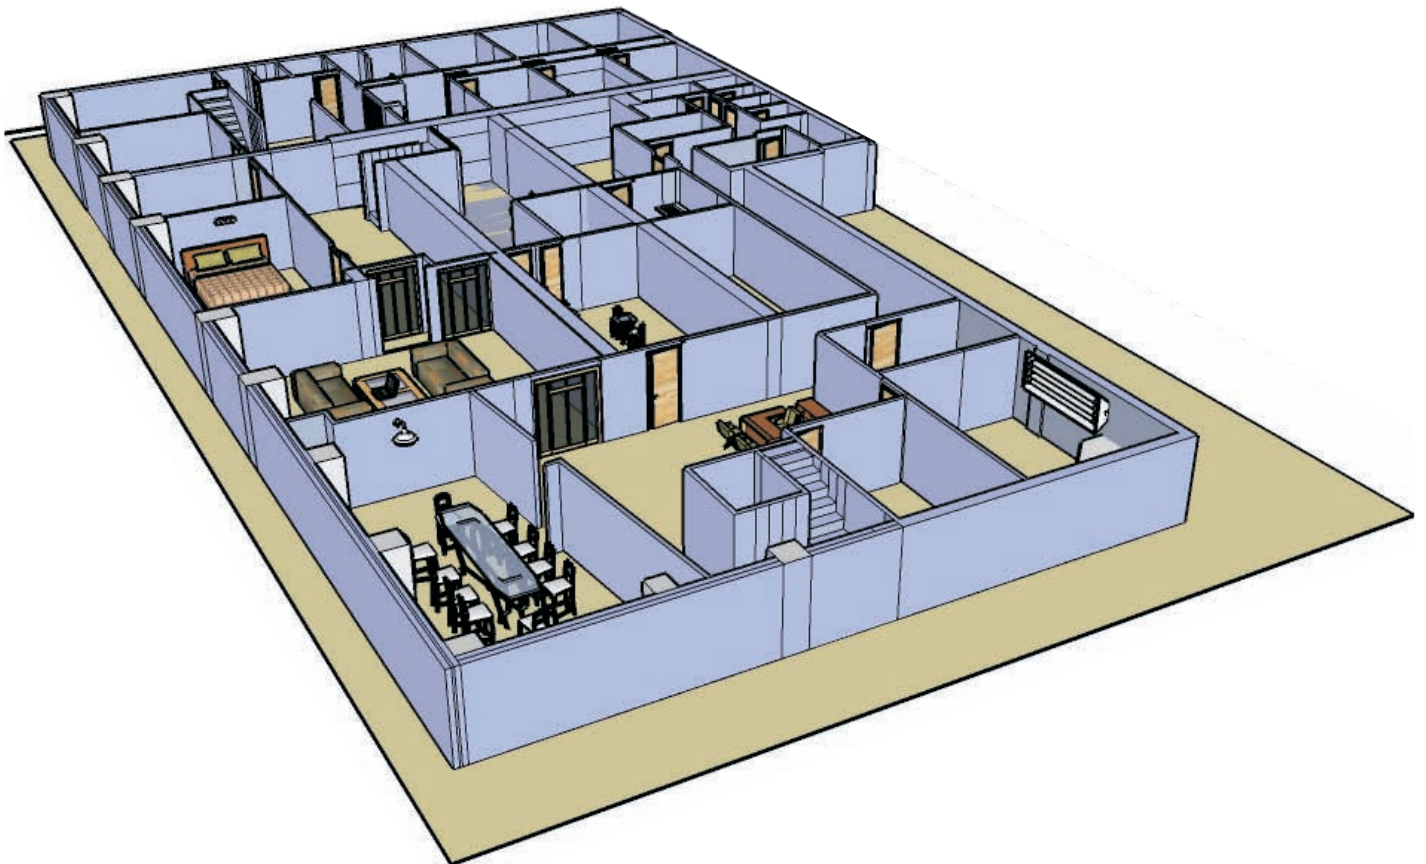

## Who we are

**DesignPresentation** is an **ISO 9001:2000** compliant CAD Design & Drafting company providing CAD, 3D Modeling and rendering services. Every project that DesignPresentation executes is assured to be of highest quality and competitively priced.

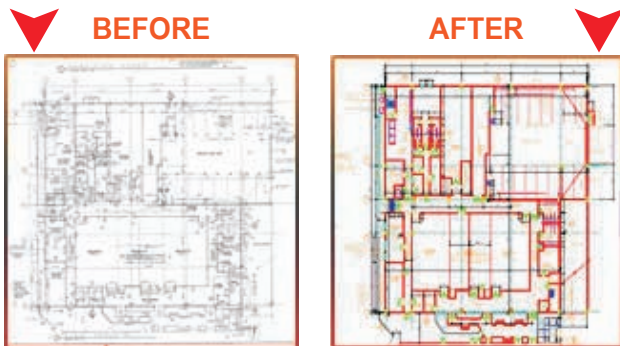

**DesignPresentation** believes customer service and satisfaction to be its **highest priority**. We accept projects in any format: hand sketches, scanned images, **PDF** format, **GIF or JPEG** format, pictures, photos or electronic files. You are not limited to these options, so please feel free to send us your projects via email, FTP, Fax or C/DVD in any format of your choice. If you need something overnight, we'll get it to you. We will help you find the best solution for your requirements.

## High quality CAD and walkthrough services

**Mission:** To impact your success through cost reduction, speed and service reliability.

# Our Services

## Raster to Vector (R2V)

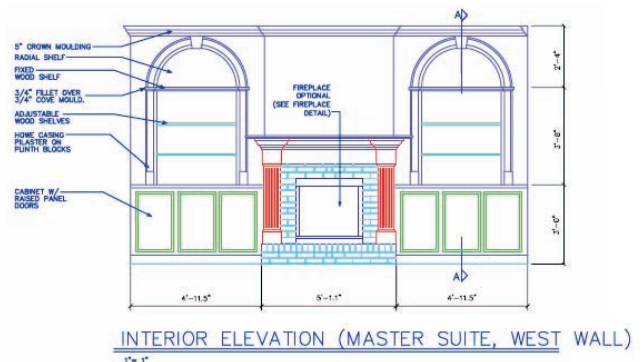

At DesignPresentation we can digitize your scanned drawings into accurate DWG, DXF, DGN or any other CAD format. The final CAD drawing is fully editable and 100% dimensionally accurate.

## Architectural Detailing and Drafting

DesignPresentation can help you with your architectural design work and can work in different software including ArchiCAD, AutoCAD, MicroStation, VectorWorks, etc.

## CAD Drafting

We provide CAD design and drafting services for architectural, civil, elevations, HVAC, landscape, piping, plans, structural, surveying and other fields.

## 3-D Modeling

With our 3D modeling service, we convert your 2D drawings or hand-drawn sketches into 3D models for Rapid Prototyping or any other 3D requirement. Software includes AutoCAD®, ArchiCAD, Mechanical DeskTop, Architectural DeskTop®, VectorWorks, TurboCAD, etc.

## Rendering and Walkthrough

Our clients use rendering and walkthrough services for multiple purposes such as interiors, panoramic views. We can create a 360° view, giving you insight into your final construction using software like Google Sketch up, 3D StudioMax, etc.

## Structural Design and Detailing

We offer structural design and analysis services. Our professional engineers collaborate with our expert detailers to develop an economical design that meets your needs. We focus on designing a safe structure without compromising your desired aesthetics and function. The steel detailing drawings with other necessary quantities (materials, nuts and bolts, panels and sheets, flashings, etc.) are made according to your specifications. This "industrialization" minimizes errors, keeps costs down and results in an improved schedule.

## HOW WE WORK

- ☆ Seek an understanding of your CAD requirements.
- ☆ Offer cost effective solutions
- ☆ Prepare draft drawings according to your specifications and submit for approval
- ☆ Deliver your project through E-mails, FTP, our automated online workflow system or CD/DVD

## BENEFITS OF OUR CAD TEAM

- 100% accuracy in the final output
- Strong and robust systems
- Dedicated and experienced team of professionals
- On time Delivery
- Best pricing
- Repeat clientele
